

Dr Yellapragada Lifesciences

Science prolongs life

Dr Yellapragada Lifesciences, Tamilnadu, India is a multidimensional biotechnology company established in the year 2012, focused on Aquaculture, Cell-based – CRO, Custom Research, Pre – Clinical & Clinical Research, Contract Research, Product Oriented Research, Product Development, Algal Research, Nano-Biotechnology and Biopharmaceuticals.

Our Aquaculture wing contains products like probiotics, Minerals, and Vitamins Feed supplements, Chemicals, and value-added products. Our state of art R&D facility enhances us to manufacture probiotics and other products using Japanese and Mexican technologies. The Probiotic strains used in the process are indigenously developed by our research scientists and have a proven track record among aquaculture hatcheries and farms. The salient feature of our probiotics is that our strains thrive under anaerobic conditions and at low DO levels.

Dr Yellapragada Lifesciences strives in providing quality products and services in aquaculture as well as in various arenas meeting the custom-based expectations of its customer needs. Innovative and rigorous science, excellence in execution, and absolute integrity combined with flexible business models has enabled Dr Yellapragada Lifesciences to deliver valuable outcomes in a relatively short period time.

Dr Yellapragada Lifesciences provides custom based solutions & best in class services to the need-based customers. Our experience allows us to comfortably work with successful and ambitious clients. With personalized customer service, our clients are provided with a trusting and effortless experience. From discovery to development and commercialization, we have the defining science, cost-effective development capabilities, and significant manufacturing capacity to move ideas to market.
